

From Python to AI Builder

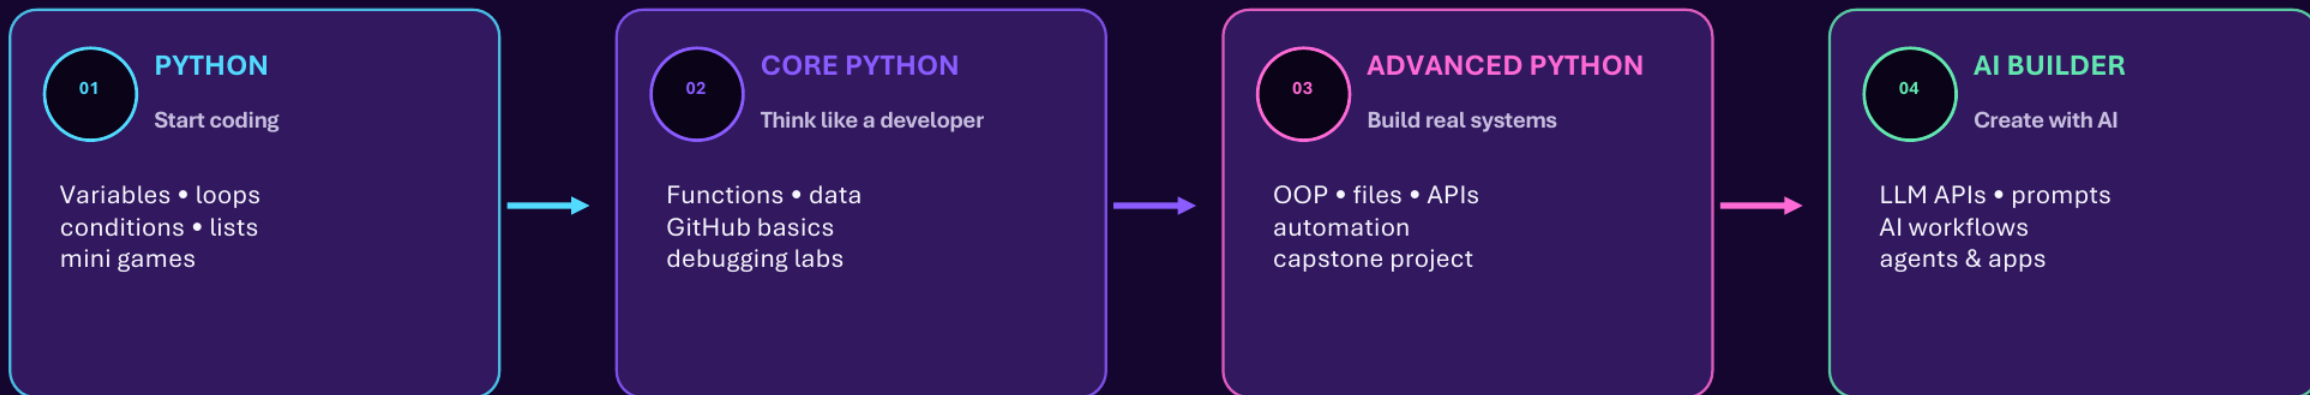

Strong Python foundations are essential to learning AI the right way — build, don't just prompt.

WHY PYTHON FIRST?

#1

Python ranked #1 in Aug 2026 TIOBE Index

SO 2025: Python grew +7 pts; "go-to" for AI, data science & backend

LIVE ON ZOOM + HANDS-ON EVERY WEEK

Students code, debug, ask questions, and build progressively — not just watch videos.

MONTH 6 FINAL CAPSTONE

Plan → build → debug → present a complete Python project + GitHub portfolio work.

The shortcut is the trap. AI without Python = using tools. Python before AI = building tools, automations, agents and real AI apps.

Source notes: TIOBE Aug 2026; Stack Overflow Developer Survey 2025.
